

KYK Customer Testimonials

Hi Alderin -

Just wanted to let you know that we are very pleased with the Harmony ionizer we purchased from Water for Life USA. It's very well designed and easy to operate. For me, having the ORP reading is a real plus, since that is possibly more important than pH. The color coded LCD makes it very easy to see what's going on. I usually run the ionizer on the "pH 10" setting for drinking water (several glasses a day) and for making green drinks. I am delighted that my pH (as measured from saliva and urine) has increased with drinking ionized water. I am also hydrating better (being 65 yrs. old, hydration is quite important).

Thanks for guiding me to purchase this unit rather than the Jupiter Melody!

Best -
Ken Kaufman, PhD

"The prime reason I bought the KYK Harmony about a month ago was that I was hopeful that it might help to relieve my my digestion problems that would typically keep me awake for half the night. For the past 25 years, I lived on acid reducers having tried every over-the-counter brand as well as a few prescription jobbies. However, ever since I started using the ionizer a month ago, I have not had the need to take a single acid reducer. More importantly, I sleep better (not perfect, but much better).

However, the other benefit from using the ionizer is just as dramatic and something I never expected. I had complained to doctors for many years that I was never able to exercise for more than twenty minutes at a time nor exercise more than two or three times a week even though every doctor would tell me to exercise more.

It seemed that my muscles and lungs would reach exhaustion after twenty minutes of exercising and it was practically impossible for me to exercise two days in a row. However, since using the ionizer, I am able to not only exercise five or six times a week, but also exercise longer (up to 40 min.) each time. Obviously, it was the higher pH and the additional oxygen from the ionized water that made the tremendous difference. Maybe you ought to tell Barry Bonds."

James, New Orleans

"I purchased my Harmony as a Christmas gift for my husband. I know the health benefits are there but the most noticeable is that the water just tastes so much better than our tap water or water through a "Brita" filter. Another amazing benefit is the effect on my house plants. I save the discharge water and use it to water my plants. My cyclamen, peace lilly, and African violets are all flowering as never before - they are loaded with blooms. The greenery is healthy and lush. I never expected this result. Anyone with house plants will be thrilled with the side benefit of the an alkaline, ionized water."

Pamela Haukaas, Hawaii

"My experience stems from a close family member with cancer and a quick education on how cancer cells tend to react to a alkaline environment in the body. I purchased a unit and did a ph test on my wife and I before we started using the new alkaline filtering system. I tested fair and the wife was acidic. We began the use of the alkaline water for

drinking, cooking, etc. along with good diet and vitamin supplementation. In approximately two months we retested our ph levels and the wife and I both improved our ph substantially. Unfortunately our family member was diagnosed too late with their cancer for anything to help. But, I have a cat that has cancer and the vet wanted to put her down in February of this year but we needed time to accept his recommendation. We put her on a better diet and began giving her only alkaline water and four months later her strength and appetite is returning along with the reduced swelling of her glands caused by the cancer. Was it the alkaline water??? All I know is my cat is living a fairly normal life four months after her vets recommendation to terminate her life. I am not a doctor and have no formal education concerning medical issues, all I know is my body and my family members have seemed to benefit from lots of alkaline water, good eating habits and appropriate vitamin supplements. I will continue to drink healthy for life!"

Randy Webb, Michigan

You can learn more about the relationship between alkaline water and cancer in our report ["Acid/Alkaline Balance in Your Body"](#)

"I had read about the importance of pH balancing, and even about a healing resort in Switzerland with natural mountain stream water with a pH of 9 (a little alkaline) that has healed many people of a variety of diseases. I measured the pH of my tap water to be a pH of 6 (slightly acidic), and my reverse-osmosis water to be a pH of 5.5 (more acidic!). I bought the KYK Harmony ionizer because I was concerned about health problems caused by drinking and cooking with this water. I set the Harmony to output with a pH of 9, and my wife and I use it for all drinking and cooking water. I found that I craved this water and drank more water over the day than before because it tasted so good. After a few days, we both noticed that our feces was dark and goopy, but there was no discomfort. This continued for about a month, and then our feces went back to normal. Since the same thing happened to both of us, and the water was the only thing we changed, we knew it was the water that caused this cleansing effect. We were surprised to get this effect since we had both been taking Primal Defense probiotic for several years. We both feel better after having switched to the water ionizer."

Eric R, California

"Purchasing the Harmony purifier has been one of the best decisions I have made for my family. After I had tried the alkaline water on two occasions, I had wanted to purchase one. The water is incredible...it is so easy to stay hydrated because it tastes so good! We cook with it, we make our coffee with it and we notice that even our "green" drinks mix up differently, the greens stay in suspension in the drink, and it tastes good! I use the acid water on anything that I want to deodorize and it works...water bottles, sponges, dishcloths, etc. no longer smell stagnant. I love my Harmony and would recommend this purifier to everyone!"

Toledo, Ohio

"One of the first things I noticed with the purifier mode was when I had used it as a water supply for my Salt Water Aquarium. These fish are notoriously delicate and susceptible to water contaminants. I kept having problems with keeping my fish alive, but after switching from tap water to the purified water out of the Harmony, my fish were surviving. I then figured that if the tap water was slowly killing my fish, what could it be doing to us who drink it daily? Now, I drink almost all my water from the Harmony. Thanks Water for Life USA!"
